

## Equiplite™ Europe Equiplite Coating application sheet.

Dear Customer,

Thank you for purchasing this Equiplite product(s).

### General

Equiplite coating is a soft, highly flexible, light-fast polyester-based aqueous aliphatic polyurethane dispersion.

### Applications

- Equiplite soft loops
- Halyards
- Glass fiber sizing

May be used without modification by spray or dip. Recommended thickeners may be added for knife-over-roll or similar methods. Air drying to normal thickness for one minute at 90°C and one minute at 150°C. Equiplite coating is a PU dispersion, which you dry to form fully polymerized films.

### Characteristics

Outstanding abrasion resistance. Gives soft, highly extensible, tough films with very dry feel. Gives high clarity films, which do not discolour on exposure to daylight. Normal high gloss finish may be modified by the addition of recommended duller.

### Packing and storage

Store in closed containers at ambient temperature (10-30°C). Fears frost with a shelf life under these conditions of at least 12 months.
