

## Equiplite® Coating application sheet.

Dear Customer,

Thank you for purchasing this Equiplite product(s).

### General

Equiplite® coating is a soft, highly flexible, light-fast polyester-based aqueous aliphatic polyurethane dispersion.

### Applications

- Equiplite® soft loops
- Halyards
- Glass fibre sizing

May be used without modification by spray or dip. Recommended thickeners may be added for knife-over-roll or similar methods. Air dries to normal thickness for one minute at 90°C and one minute at 150°C. Equiplite® coating is a PU dispersion, which you dry to form fully polymerized films.

### Characteristics

Outstanding abrasion resistance. Gives soft, highly extensible, tough films with very dry feel. Gives a high clarity film, which do not discolour on exposure to daylight. Normal high gloss finish may be modified by the addition of recommended duller.

### Packing and storage

Store in closed containers at ambient temperature (10-30°C). Fears frost with a shelf life under these conditions of at least 12 months.
